To quote one of my viewers during a stream we did of this: "This game looks like its in a massive fart cloud..." and is worth less than what you pay for it...considering that you don't pay anything, that should say enough.. The best game that mixes TF2 and tower defense and other stuff. I wonder why I stopped playing it.. This game is a nice little game i'll get quite a bit of enjoyment out of, i see lots of people saying "Oh iy's a plague inc ripoff" "This is plague inc" "OHHHHHHHHHHHHH Plague inc is gonna SUE YOU!" but no, it's not just like plague inc, Plague inc is fairly easy to play and WAYYYYYYY to easy on easy mode, This game however, is a challenge even on EZ mode. I would reccomend this game to absolutely everyone.. Hard, rage-inducing, yet forgiving in every misstep. Impulsion is a game that encourages you to keep going, no matter how many times you hit that orange field, or fall into the water. While I admit that I want a checkpoint system, starting over from the beginning of the level each time allows you to get better at each section, making sure you understand the timing.

It's fun and addictive, and the mechanics get easier as you go along. I recommend having everything on low if you wish for a slightly easier time, that definitely helped me get through some levels and I'm planning on having it like this the whole way through.

In other words, give it a try. You might throw something across the room, but it's very much worth giving it a go! Nice job on this one, fellas!. This is not DLC, it's something that should've been in the base game, not worth it if you didn't get the season pass.

DLC implies content that changes the game majorly and this doesn't, DLC shouldn't exist to begin with..... Amazing for any Star Wars fan, only down side is that it requires a joystick or flight stick. Sometimes the blood bar will become negative, and the robot will not die.

A cool simplistic space game for \$5 I'd say it is worth it.. The Sand People are easily startled, but they will soon be back, and in greater numbers.. Doesn't work. Money wasted. It keeps telling me to go to the webpage to update the client, but I can't find an update... Only recognised a Thrustmaster T300 rs once in five goes, then I couldn't get anything to work properly.. Addictive and amusing / hints (early levels only) were annoying me but I found out you can pause the level and turn them off..

Now THIS is what gets me. THIS dev is something ELSE. THIS should be not forgiven. THE DEV SHOULD BE PUNISHED. THE DEV IS A LIAR THAT IS WORSE THAN DIGITAL HOMICIDE. God damn me if this developer can be more lying than in 2017, where I bought this game and not knew how disgusting the creator is. The game itself is ALSO barebones, not even Phil Fish can compare to this amount of lying, or DigiHom's greed. This novel was boring and only exists on fetish content without any kind of "story", but also has a moronic creator who is a major LIAR, as I said earlier. DO NOT SUPPORT THIS DEVELOPER. Please listen to this guy's truth. Do not succumb to evil developers/companies trying to rip you off.. Just Got The L-39 About An Hour Ago. Took It For A Few Spins, This Girl Left A Huge Impression On Me. I'm In Love With This One.
