As the U.S. Postal Service continues to lose money each year, a new report suggests a way to add to its bottom line: offer banklike services, such as a check cashing card that would allow holders to make purchases and pay bills online or even take out small loans. The idea is to provide services that are now unavailable in many communities.

More than a quarter of all Americans, some 68 million, are now underserved by banks — "underbanked," as [the white paper](#) from the Inspector General of the U.S. Postal Service calls them. They live in places where there are no bank branches, or just one. Many have to rely on check cashing outlets and payday loans, which often charge exorbitant fees.
