This tutorial will show you how to create a new page and how to insert some different kinds of media. We will discuss the different sections in each page, show how to create a page and then insert the content. There are two main areas in each Allplan page. These are: The HTML header and footer. This is always at the top and bottom of each page and contains the name, address, copyright, etc. The main content area. This is the content you add to your pages. This is the content you add to your pages. Let's look at each of these in a bit more detail. HTML header and footer The HTML header and footer is the section at the top and bottom of every page that contains the name, address, and copyright etc. Here is an example of how it would look in Allplan. In the screenshot above you can see that the HTML header and footer is on the first page of the tutorial and it contains a sample of the header and footer of the tutorial. The header contains the name of the page, the logo, the phone number, and a

copyright notice. The footer contains the name of the author, the copyright notice, the name of the organisation, and a version date. At the end of each tutorial there will be a Download page with a link to the free Allplan 2016 download. The main content area The main content area is the area that contains the bulk of the content of the page. We will look at how to create a new page and then add content to the page in the following sections. Creating a new page To create a new page, from the Pages menu, select Create New Page. The Create New Page page opens up where you can enter a title, the name of your company, and the page will be created. If you have any media already imported into Allplan, this is the easiest way to create the page. When you add media, the media will appear on the page as a heading in the HTML code. Adding media Let's look at adding media to the tutorial. From the Pages menu, select the Insert tab. The Insert tab gives you access to all the media you have imported into Allplan. Here we will look at adding a PNG image, a JPG image and video, and a PowerPoint presentation 82157476af
